Dear Property Owner,

We welcome you to take advantage of goDCgo's complimentary assistance to comply with transportation information and service requirements of your zoning order. These requirements provide sustainable transportation options for residents and people visiting or commuting to your property. Your business is on the way to becoming even more competitive in the marketplace by offering sustainable amenities.

The District of Columbia is attracting new residential, commercial, retail development, and redevelopment at an unprecedented pace. This activity, while highly beneficial in many respects, generates significant additional vehicular traffic to, from, and within the District. The District ensures the provision of services and programs that reduce driving alone at the building level to further the District's goals of preserving and enhancing the quality of life for all residents and visitors.

This toolkit was created to support your path to compliance and the aspects of your zoning order that involve transportation services and programs to guide you through the process. Additional resources are available at goDCgo.com. Reach out for assistance implementing transportation requirements or questions on ways to enhance your transportation amenities.

Sincerely,

The goDCgo Team
202-299-2186
info@goDCgo.com

What is goDCgo?

goDCgo is an initiative of the District Department of Transportation (DDOT) that encourages the use of sustainable transportation. Our goals serve to decrease traffic congestion, improve air quality, and create a better quality of life in the District of Columbia. Our Residential Services team provides complimentary consultations to multi-family residential buildings to enhance their transportation amenities, making it easier for your residents to choose sustainable, affordable, and healthy ways to get around the city.

We can support you in implementing the transportation demand management (TDM) requirements of your zoning order that involve the provision of transportation services, information, and programs on-site. We can also connect you to other resources for assistance in implementing other transportation-related requirements. If you are a non-residential property (hospital, hotel, office building, etc.) and need support with TDM efforts as apart of your site condition, goDCgo can support you as well.

Why Should You Work with goDCgo?

goDCgo provides ongoing support through our Transportation All-Star Program, a voluntary initiative open to all multi-family residential buildings in the District. Meeting the requirements of your zoning order automatically makes your property eligible for a goDCgo Residential All-Star designation, which unlocks immediate benefits for your property. You will have access to promotional advertising, opportunities to be highlighted in goDCgo's marketing such as a success story, and receive up-to-date transportation information. As a result, you will be equipped with sustainable amenities and stand out amongst your competition in the marketplace.

What is TDM?

Transportation Demand Management (TDM) is the application of strategies and policies to maximize consumer travel choices. Through TDM programs, such as goDCgo, people are encouraged to use alternative transportation options such as walking, biking, taking transit, scooting, and ridesharing. TDM actively nurtures a sustainable city to improve the quality of life in all communities.

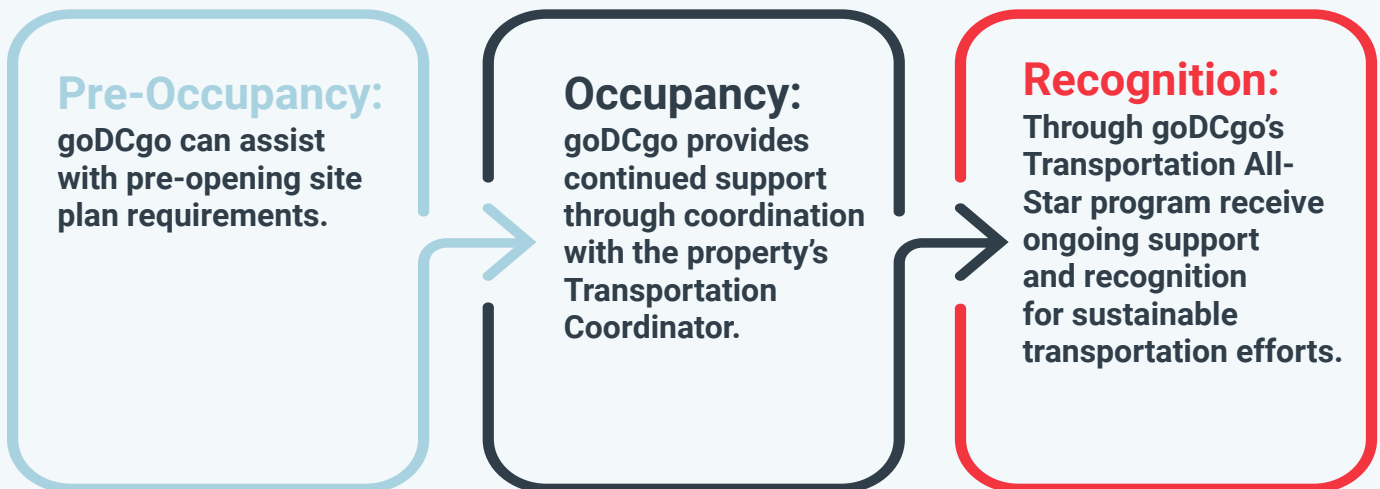

How to Use This Toolkit?

This toolkit serves as a guide to help you implement the TDM requirements in your residential zoning order. It also provides DDOT resources including guides and regulations that can address questions you may have regarding compliance.

The District of Columbia Office of the Zoning Administrator enforces the provisions of the DC Zoning Ordinances. goDCgo plays no role in zoning enforcement. Our complimentary services include assisting properties in complying with TDM requirements contained in the final zoning order.

Once you receive your approved TDM Plan, goDCgo can support in the following phases:

Getting Started

Email an attachment of your final order to info@goDCgo.com and include your zoning case number in the subject line.

Transportation All-Star Program

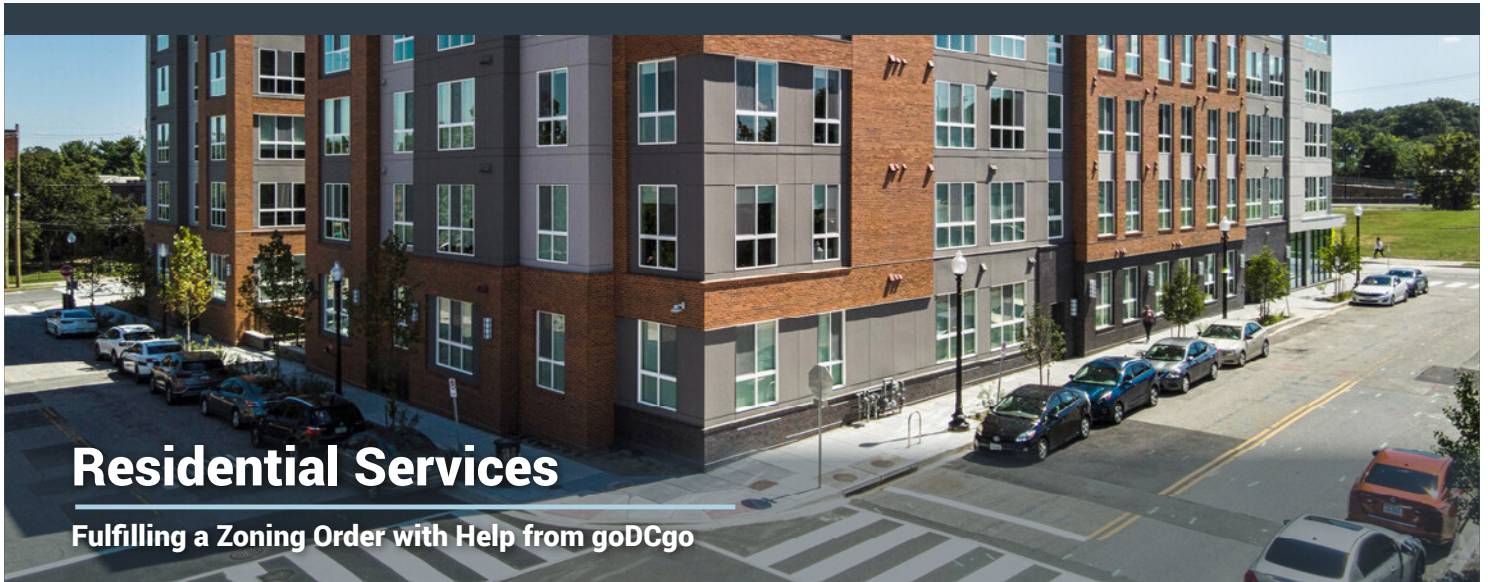

The goDCgo Transportation Ambassadors Program recognizes residential multi-family properties in Washington, DC for exemplary efforts in transportation leadership. By offering transportation amenities and creative program incentives for residents, these organizations are helping to make the District the healthiest, greenest, and most livable city in the United States. By complying with your zoning order and working with goDCgo, you can receive a designation and all the perks associated.

Perks:

- Recognition at our Annual Transportation All-Star Awards Ceremony
- Featured on goDCgo.com
- Official award
- Window cling
- Opportunities to be featured in goDCgo success stories and monthly newsletter
- Social media support – including mentions, retweets and follows on all platforms
- Continued support from goDCgo through our complimentary services: lobby events, brochures, transportation consultations, surveys, and more
- All-Star designation

Success Story

Residential Services

Fulfilling a Zoning Order with Help from goDCgo

Located in the Parkside neighborhood of Washington, DC, Vesta Parkside combines luxury, comfort, and convenience with its city views, amenities, and location. Going above and beyond, Vesta Parkside focuses on making sustainable transportation accessible for residents and staff through its TDM strategy.

ZONING ORDERS IN THE DISTRICT

The District of Columbia is attracting new residential, commercial, and retail development, and redevelopment at an unprecedented pace. While this activity has many benefits, it also increases traffic to/from and within our nation's capital. To enhance the quality of life for residents, commuters, and visitors, the District issues zoning orders that require buildings to implement sustainable transportation services and programs that reduce the number of single-occupancy vehicles (SOV), also known as Transportation Demand Management (TDM). As a complimentary service, goDCgo supports properties implementing the transportation demand management (TDM) requirements of their zoning orders that involve the provision of transportation services, information, and programs on-site.

COMPLETING THE PLAN & GOING BEYOND

Vesta Parkside's commitment to providing residents and staff with sustainable transportation options led the property to seek guidance from Lessie Henderson, Residential Outreach Coordinator at goDCgo, to review its TDM plan and assist with implementing strategies. Vesta Parkside had already implemented some amazing

PROPERTY MANAGEMENT COMPANY

KETTLER Management Company

PROPERTY SIZE

191 Units

YEAR OPENED

April 2022

goDCgo Zoning Assistance

TDM strategies and amenities like bike storage, a discounted carshare membership for residents, EV charging stations, and a transit screen in their lobby. To help them go even farther and fulfill all items in their TDM plan, Lessie assisted Alex Dickson-Patrick, Community Manager at Vesta Parkside, by sharing a residential vendor list for amenities, providing Capital Bikeshare memberships to its residents, creating a Get Around Guide and hosting lobby events to share sustainable transportation options for residents and staff.

Lessie also introduced the property to goDCgo's Transportation All-Star program, which recognizes DC organizations for their sustainable transportation efforts. Because of all the amenities and benefits they worked with Lessie to implement, they qualified for a Transportation All-Star designation at the highest level, Platinum. goDCgo helped them celebrate their accomplishment by holding a ribbon cutting ceremony for residents, staff, and guests to attend.

"Lessie and the goDCgo team were beyond supportive in getting our TDM plan in place. Lessie's knowledge and expertise really made fulfilling our zoning order a much smoother process. We even got to end on a great note, celebrating our new Transportation All-Star status with a goDCgo ribbon cutting! We are thrilled to continue our partnership with goDCgo to ensure all sustainable transportation options are available to our residents!"

- Alex Dickson-Patrick, *Vesta Parkside Community Manager*

Vesta Parkside's consistent engagement and proactiveness towards providing sustainable transportation options has not only fulfilled their zoning order but also made it easier for their residents to choose sustainable, affordable, and healthy ways to get around the District.

- 1 TDM Plan Creation**
Use our sample plan/templates or meet with goDCgo staff for assistance creating your TDM plan.
- 2 Staff Training**
goDCgo provides complimentary sustainable transportation training for property employees.
- 3 Transportation Survey Design**
Utilize custom commute surveys to understand tenants' current travel behavior and recommend effective TDM Strategies.
- 4 Vendor List**
We maintain a robust list of preferred transportation amenity vendors that are required or optional under DC zoning.
- 5 Capital Bikeshare**
goDCgo supports property managers in purchasing Capital Bikeshare annual memberships for residents.
- 6 On-Site Promotions**
Host a lobby event to share information and resources with residents.
- 7 Brochure**
Request a customized Get Around Guide that details all the transportation options available near your location.

- a. **Prior to issuance of a final certificate of occupancy**, a member of the property management group shall be made a point of contact and will be responsible for coordinating, implementing, and monitoring the TMP strategies ("TMC"). This includes the development and distribution of information and promotional brochures to residents, visitors, patrons, and employees regarding transit facilities and services, pedestrian and bicycle facilities and linkages, ridesharing (carpool and vanpool), and car sharing. In addition, the TMC will be responsible for ensuring that loading and trash activities are properly coordinated and do not impede the pedestrian, bicycle, or vehicular lanes adjacent to the development, including the existing alley located behind the proposed building. The contact information for the TMC will be provided to DDOT/Zoning Enforcement with annual contact updates;
- b. **Prior to issuance of a final certificate of occupancy**, a TransitScreen will be installed in the residential lobby to keep residents and visitors informed on all available transportation choices and provide real-time transportation updates. In addition, the TMC will provide a link to the TransitScreen website at move-in for new tenants;
- c. **Prior to issuance of a final certificate of occupancy**, the TMC will establish a TDM marketing program that provides detailed transportation information and promotes walking, cycling, and transit. The marketing program will utilize and provide website links to CommuterConnections.com and goDCgo.com, which provide transportation information and options for getting around the District;
- d. To help encourage non-auto transportation uses, the Applicant will provide the first occupant of each residential unit over a two-year period with a one-time annual carsharing membership and application fee, a \$100 SmarTrip card, and a one-time annual Capitol Bikeshare membership to help alleviate the reliance on personal vehicles. These incentives will be included in a move-in transportation package that includes brochures for transit facilities as well as bicycle and car sharing services for the first occupant of each residential unit; and
- e. **Prior to issuance of a certificate of occupancy**, the Applicant will provide four short-term bicycle racks on H Street and two short-term bicycle racks on 4th Street.
- f. Install one electric car-charging station in each of the new Residential Towers; and

Sample Zoning Order 2

TDM Language

2

In order to mitigate any possible adverse impacts from traffic generated by the project, the Applicant proposed the following transportation demand management ("TDM") plan (Ex. 23; Ex. 57):

- i. Parking costs will be unbundled from residential units. Leased units will not include a parking space as part of rent;
- ii. Twelve bicycle parking spaces will be provided near site entrances outside the building. Sixty-nine secured bicycle parking spaces will be provided in the parking garage for use by residents;
- iii. Information on transportation options will be presented to residents via a transportation kiosk in the lobby of the residential building. The kiosk will contain information promoting walking, cycling and transit;
- iv. A website for the residential building will be established including similar information as the kiosk, with links to www.godcgo.com and similar websites;
- v. A member of the property management group will be designated as the Project's TDM coordinator, and will be responsible for coordinating, implementing and monitoring the TDM program; This includes establishing a marketing program and maintaining the information kiosk and website;
- vi. The Applicant will host a transportation mobility fair six months after the residential building has opened to new residents. The on-site TDM coordinator will work with DDOT's goDCgo team to organize representatives to present non-auto transportation options to all fair attendees in the residential building and the church;
- vii. In the residential lobby and in an appropriate location in the church near its entrance, provisions will be incorporated into the design that will allow placement of flat screen monitors with the intent of having these monitors be used to display up-to-date transit information; and
- viii. The Applicant will maintain or relocate existing bus stops adjacent to the property during construction.
